

ADOPTION AGENCY REFERRALS

All-Options refers to the following nonprofit adoption agencies or placement organizations. To the best of our knowledge, these nonprofit organizations all meet the following standards:

- They actively support pregnant people in all their options, including abortion and parenting.
- They are committed to arranging and supporting fully open adoptions. While level of contact and openness may vary by specific situation, the agency does not arrange legally closed adoptions where no future information exchange or contact is possible.
- They accept single parents and same sex couples as prospective adoptive families and allow pregnant people and birth parents to make their own decisions about adoptive families.

Because of our commitment to lifelong counseling and support for birth/first parents, All-Options refers only to nonprofit adoption organizations. We welcome suggestions to add to our list!
